

Shemrei Marabillo

smarabillo.dev@gmail.com | +639569180544 | San Carlos City, Negros Occidental 6127

A Bachelor of Science in Information Technology student with a strong focus on web development and design. Skilled in both independent and collaborative work, with a proven ability to adapt quickly to new concepts and technologies. Passionate about delivering high-quality results that align with organizational objectives and driven to contribute to innovative and impactful projects.

Experience

Freelance Web Development, Full-Stack Web Developer

December 2024 - December 2024

Developed a custom small-scale web application tailored to a client's needs for a fun run event, focusing on functionality and user experience. Collaborated with the client to gather requirements, implemented features to meet their objectives, and ensured the final product was efficient and user-friendly.

Freelance Graphic Design, Presentation Designer

February 2024 - January 2025

Created professional, high-quality presentations tailored to client needs, ensuring clear messaging, visually appealing designs, and alignment with their objectives. Worked closely with a client to understand his goals and deliver impactful, engaging presentations.

Woflow, Data Entry Specialist

January 2023 - February 2023

Handled data entry tasks at Woflow, ensuring accurate and organized information while meeting deadlines and quality standards.

Spade Academy Gaming Guild, Discord Server Moderator

January 2023 - February 2023

Managed and moderated a 700+ user community, handling operations, resolving concerns, implementing automation, and optimizing the server for functionality and visual appeal.

Philippines Start Up Challenge DICT 2023 (Top 25)

September 2023

Ranked top 25 of the Philippines Startup Challenge DICT for pitching 'Tours,' a mobile app designed to enhance the tourist experience in Bacolod City. Responsible for creating the app's mockup, branding, and logo, providing users with easy access to local attractions and travel information.

Transendicators Speaker (Front-end Development)

September 2024

Served as a speaker for IT freshmen at USLS, delivering an engaging session on basic front-end development. Covered key front-end technologies, foundational concepts, and practical tips to help students build a strong understanding of web development.

Publicity and Creatives Head (Information Technology Society Club)

August 2024 - Present

Responsible for managing and creating pubmats for the club, ensuring consistent branding and visually appealing designs. Collaborated with team members to develop creative concepts, meet deadlines, and effectively communicate the club's activities and initiatives through engaging visual content.

Skills

Technical Skills and Languages

Webflow, Figma, Canva, Photoshop, Tailwind, Bootstrap

Education

University of St. La Salle Bacolod

Bachelor of Science in Information Technology, August 2021 - Present

Colegio de Sto. Tomas - Recoletos

Science, Technology, Engineering and Mathematics (STEM), June 2019 - May 2021

Projects

Skasiyahan - Fun Run (Web Application)

SKasiyahan is a fun run management web app designed to streamline event operations. It enables admins to quickly search for runners by their bib number as they cross the finish line, displaying their details instantly. The system also allows adding new participants and viewing a complete list of registered runners, making it an essential tool for efficient fun run event coordination

Vipers Gym (Website)

Vipers Gym, a premium fitness center, requires a modern and user-friendly website to enhance its online presence. The website is currently a prototype developed using Tailwind CSS, designed to serve as an essential tool for marketing, member engagement, and information dissemination. The design reflects the gym's brand identity, emphasizes ease of navigation, and incorporates functionalities to support existing members while attracting new ones.

Safesync - Road Incident Management for BTAO (Web Application)

SafeSync is a capstone project which is a web and mobile application we developed for BTAO officers in Bacolod City to streamline the reporting of road incidents. The app enables officers to quickly submit incident reports, which are then managed by admins and forwarded to the relevant departments for action. SafeSync enhances efficiency, ensuring timely communication and response to road-related concerns.

smarabillo.webflow.io - Web Portfolio (Webflow)

Developed a modern and visually appealing web portfolio using Webflow, showcasing projects, skills, and services. Focused on responsive design, smooth navigation, and a professional layout to highlight expertise effectively.

Certificates

Webflow 101

Webflow, June 2024

Layouts Level 1

Webflow, June 2024

Devfest 2023

Google Developers Group, October 2023
